Attachment Sheets for Reissue Application Declaration
by the Assignee

The errors upon which reissue are based are described as follows. Claims 10, 11 and 13 are believed to be defective.

(1) Claim 10 is believed to be defective for the reason that the Patentee believes that it claimed less than it has the right to claim in the patent. The patent specification, in at least the sections cited in the Preliminary Amendment submitted herewith, provides support for a heat treatment carried out at a temperature of less than 800°C. Instead of depending from independent claim 8, to encompass a temperature of 800°C, claim 10 was written to depend from claim 9. Claim 9 recites, "wherein the heat treatment is carried out at a temperature of at least 700°C." Thus, claim 10 in effect claims a range of 700°C - 800°C, where support exists in the patent specification to claim a temperature of less than 800°C.

(2) Claim 11 is believed to be defective for the reason that the Patentee believes that it claimed less than it has the right to claim in the patent. The patent specification, in at least the sections cited in the Preliminary Amendment submitted herewith, provides support for the elements of claim 11 without limiting the method to the temperature of claim 9, which is at least 700°C. In other words, claim 11 should be dependent from independent claim 8, which does not recite a temperature limitation, instead of dependent claim 9, which does recite a temperature limitation.

(3) Claim 13 is believed to be defective because there is unclear antecedent basis in claim 13. Therefore claim 13 is deemed to be indefinite under 35 U.S.C. § 112, second

paragraph. In particular, claim 13 recites, "the method of claim 12, wherein the heat treatment is carried out at a temperature not greater than 850°C." However, claim 12 fails to refer to a heat treatment. An antecedent basis can be provided if claim 13 is amended to recite, "[t]he method of claim 12, further comprising applying a heat treatment to the first and second layers of the film, wherein the heat treatment is carried out at a temperature not greater than 850°C." Thus, proper antecedent basis for "the heat treatment" would be provided.
